

March 2006

Dear Customer,

Newtronic Products Under New Management

Following the recent liquidation of Newtronic Systems Ltd. we are pleased to announce that Autocar Electrical Equipment Co. Ltd - the company who designs and manufactures the superb **Lumenition** range of optical ignitions and engine management systems – is now the manufacturer and distributor of the Newtronic product range.

Manufacture is being transferred to Autocar's London premises and we hope customers will bear with us whilst products are brought back onto stock.

From the 10th March 2006 all Newtronic's Emails and web orders have been transferred to Autocar and we are responding to all enquiries received after that date.

- If you have asked for help with a technical or product problem, we shall keep your enquiry on file and expect to get back to you shortly.
- Although Autocar has assumed none of the liabilities nor contractual obligations from Newtronic Systems Ltd., if your Newtronic system has failed under warranty we will endeavour to resolve the issue at our discretion and on a case by case basis.
- If you have placed an order via the Newtronic's web site since 10th March 2006 we can assure you that your card has not been charged and your order details have been securely stored. In due course we will contact you with an update on current stock levels and product pricing, giving you the opportunity to place an order with Autocar for any of the supported Newtronic product range.

Unfortunately any enquiry or email sent to Newtronic **before** 10th March 2006 - **including product orders** – will not have been received by us and we have no method of retrieving that data or dealing with any issue that might have been raised.

Any issues regarding outstanding debts or payments to Newtronic Systems Ltd., must be addressed directly with the Liquidators, T.H Associates (tel: 01772 641146.)

We hope to keep any frustrations and the inevitable delay to product availability to a minimum during the transition period and firmly believe that recent developments are a step forward for Newtronic products. We look forward to developing Newtronic systems in conjunction with our other innovative products - the Lumenition range of ignition solutions and Micro Dynamics' shift lights, rev limiters and engine control systems – to offer all our customers the first class products they demand.

Yours Sincerely

Autocar Sales Support,
Autocar Electrical Equipment Co. Ltd.
